

# Recorded Future for Public Sector

Trust us to support you. Leverage the Intelligence Provider Trusted by Organizations Across US Public Sector to Support Critical Missions.

You are not alone. For the past 12 years Recorded Future has helped organizations in the public and private sectors tackle the most difficult intelligence, security, and risk challenges. In doing so, we have gained some of the most unique perspectives, techniques, and solutions and built a community of experts from our company and customers that are here for you and your team every step of the way.

## Public Sector Teams Rely on Recorded Future Intelligence For:

- **Threat Intelligence Analysis:** Enabling deep cyber and technical research and analysis of Nation-State threats, malware trends, and security-related topics including historic trends via automated collection, customizable queries, analytic dashboards, and finished intelligence reporting.
  - **USE CASE IN ACTION:** Offensive & defensive cyber analysts use Recorded Future's advanced query builder to understand the latest nation-state TTPs and tools and take action by using our Hunting packages
- **Security Operations:** Intelligence to help cybersecurity analysts be more effective and efficient by optimizing alert triage, threat detection, incident response, and enrichment. Integrations with all leading cybersecurity vendors so analysts can get our intelligence directly where they spend most of their time.
  - **USE CASE IN ACTION:** Government SOC and CERT analysts leverage Recorded Future intelligence fed directly into their SIEM and SOAR tools to prioritize and enrich the massive number of alerts they receive.
- **All-Source Intelligence & Disinformation Analysis:** Track and analyze foreign military activity, counterterrorism issues, foreign investment, chatter about your forces, and more through deep research and analysis, multi-language automated intelligence collection, tailored analytic dashboards, alerting on your key topics, and historic trend analysis.
  - **USE CASE IN ACTION:** All-source intelligence analysts query the deep global source collection to research Russian and Chinese military activity and information operations and identify trends using advanced visualizations.

## RECORDED FUTURE DIRECTLY SUPPORTS THE MISSIONS OF

- Governments of 32 countries around the world
- Over 150 Global Government, Defense, Intelligence, and Law Enforcement organizations
- 15+ global CERTs
- Over 1,000 customers and 6,000 users globally and growing by over 50% every year

- **Supply Chain Risk & Monitoring:** Intelligence support to identify and monitor threats to your supply chain and vendors and investigate foreign military supply chain activity and trends.
  - **USE CASE IN ACTION:** Intelligence and risk teams use Third Party & Threat Intelligence to identify threats to a military aircraft's supply chain while also understanding the supply chain of foreign militaries.
- **Physical Security:** Monitor threats to and mentions of your and adversary's key locations and executives through location-based risk scoring and alerting, trend analysis and geofencing.
  - **USE CASE IN ACTION:** Physical security teams add lists of their and/or adversary locations and personnel of interest and receive real-time alerts on any mentions or threats to them.
- **Criminal Investigation Support:** Intelligence from social media, dark web, forums, messaging platforms, and other critical sources to optimize criminal investigations, OSINT analysis, or dark web research.
  - **USE CASE IN ACTION:** Criminal investigators and OSINT analysts conduct deep analysis of social media and dark web sources to support ongoing investigations with data that wouldn't have had before.

## Intelligence for All. The Fusion Center Vision Powered by Recorded Future

### Use One Intelligence Provider to Support the Largest Variety of Use Cases and Teams Across Your Organization.

What if there are teams across your organization that could be using intelligence and don't even know what it is, what it does, where to get it, or how it can help them? Well, there are...and Recorded Future can support them too.

We know this because on a daily basis Recorded Future advises organizations on how to insert and share actionable intelligence across all teams to get the power of intelligence that traditional security and intelligence teams know and love but for non-traditional intelligence consumers. Teams that use intelligence today understand the power of having trusted, actionable intelligence to support their missions, the hard part is getting non-traditional intelligence consuming teams to understand the art of the possible.

You're not the first organization to face this challenge and you definitely aren't alone in this endeavor. Public and private sector teams have been challenging the norm with trusted, independent intelligence from Recorded Future. Using the guiding principles of the Fusion Center model created in the United States after 9/11, Recorded Future arms analysts not just in security or intelligence functions but across the entire organization with intelligence that is applicable and actionable for all missions.

### What is the Recorded Future Fusion Center Vision?

An intelligence fusion model to increase cross-organization intelligence sharing and analysis for public sector teams around the globe. Recorded Future provides tailored intelligence to support the missions of the entire organization by ensuring relevant information is collected, processed, and made actionable for all the departments who can benefit from intelligence.

- An intelligence-for-all approach giving cross-functional teams access to valuable, trusted intelligence no matter the use case or job title
- Internal and external situational awareness to understand all threats and inform decision makers
- Global and technical source diversity to ensure relevant coverage
- Information sharing cross-use case workflows to promote intelligence-led action for the whole organization

### What Teams Could Benefit from Leveraging Intelligence from Recorded Future?

- Cybersecurity
- Intelligence
- Risk
- Vulnerability Management
- Human Resources
- Physical Security
- Information Technology
- Operations
- Executive Staff
- The possibilities are endless...

## ABOUT RECORDED FUTURE

Recorded Future is the world's largest provider of intelligence for enterprise security. By combining persistent and pervasive automated data collection and analytics with human analysis, Recorded Future delivers intelligence that is timely, accurate, and actionable. In a world of ever-increasing chaos and uncertainty, Recorded Future empowers organizations with the visibility they need to identify and detect threats faster; take proactive action to disrupt adversaries; and protect their people, systems, and assets, so business can be conducted with confidence. Recorded Future is trusted by more than 1,000 businesses and government organizations around the world.
